PROFESSIONAL EXPERIENCE

GIGAWRKS.

St Petersburg, FL, United States

Frontend Developer:

(June 2023 – Present)

- Developed a mobile e-commerce app for the company using TypeScript, React Native, Redux, and Tailwind, focusing on testable, scalable, and reusable components.
- Enhanced REST API caching with TanStack Query and implemented WebSockets on frontend, handling chats, notifications, maps, and other functionalities requiring live updates.
- Integrated payment system using Stripe API, allowing users to manage payment and payout methods.
- Gained deep knowledge of user experience developing elaborated animations, ensuring accessibility with reduced-motion preference on all animations presented across the app.
- Implemented Jest testing and followed Atomic Design to apply development best practices, contributing to app's reliability and developer experience.

AAK TELE-SCIENCE, INC.

Davis, CA, United States

Frontend Developer:

(Nov 2022 – June 2023)

- Contributed on team management creating and assigning tickets to other developers as a co-lead.
- Developed the company's website with TypeScript, React, CSS3, HTML5, and Recoil, building a robust scientific research online platform.
- Worked on a company's internal Electron application, allowing managers to track tasks, activities, and team's productivity.

EDUCATION

Pontifícia Universidade Católica do Paraná
Associate's Degree in Applied Artificial Intelligence

Curitiba, PR, Brazil
(July 2023 – Present)

PROJECTS

[POETICOS.](#)

Curitiba, PR, Brazil

Software Developer:

(Sep 2024 – Present)

- Conceptualized, designed, and developed a website where users can listen, recite, read, write, and study poetry using TypeScript, Next.js, Drizzle, and MySQL.
- Deployed the website on Netlify with a domain registered through Registro.br.
- Implemented ads on the website using AdSense.
- Integrated Google Analytics to count, track, and analyze users' events.
- Managed traffic, statistics, and SEO with Google Search Console, Bing Webmaster Tools, and Schema.org.

GEOGABURI.

Curitiba, PR, Brazil

Software Developer:

(May 2024 – Present)

- Conceptualized, designed, and developed an Android, iOS, and web browser app for geography enthusiasts using Dart, Flutter, Python, Django, and PostgreSQL.
- Published all app versions using Google Play Console, App Store Connect, Netlify, Heroku, and GoDaddy.
- Implemented ads on the mobile app using AdMob and Amazon Affiliates, ensuring monetization occurs without compromising user experience.
- Integrated Firebase and Google Analytics to count, track, and analyze users' events.
- Developed an internal desktop app to manage questions, languages, game modes, and other app related entities using Dart and Flutter.
